

Team 12 - Daniel Gonzalez (CS), Branden Taylor (CS), Sydney Combs (CS), Nathan Pelletier (CS), Jacob Parnell (CS)

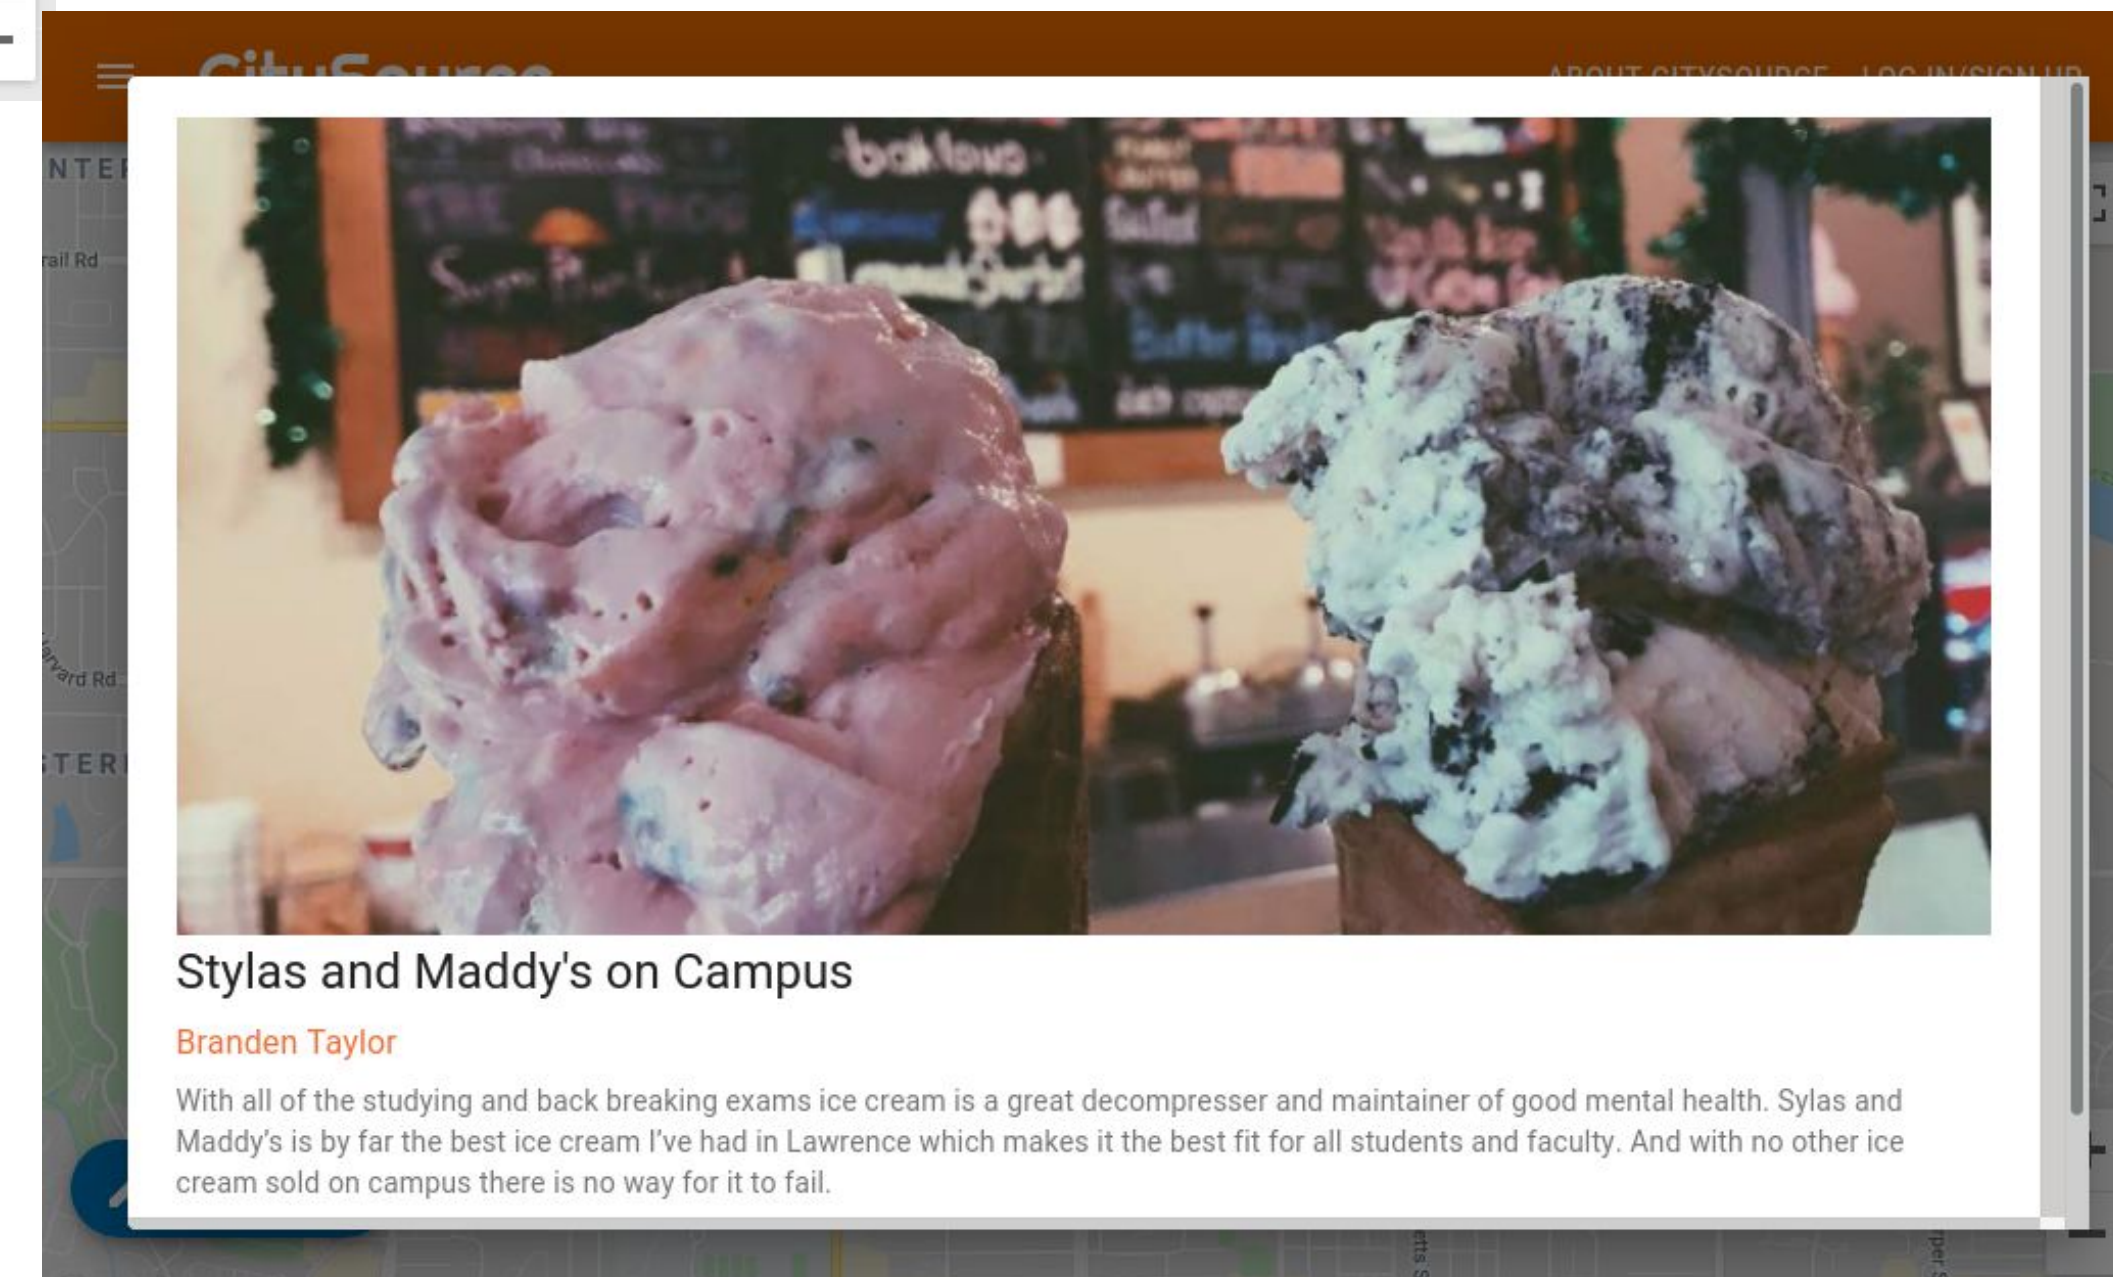

Description & Purpose

A platform for residents and city developers to engage with and propose developments for their cities.

This project will allow city developers to gain input for potential developments and get feedback on current or proposed developments from residents.

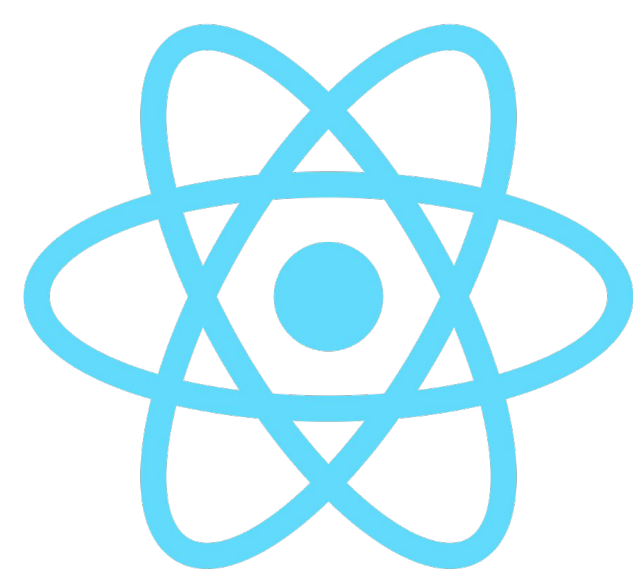

Landing page with pins on the map representing posts

A post outlining a proposed development

Design

React - front end design

Google Maps API - map interface

Firebase - database

Ethical & Intellectual Property Issues

Users may voluntarily supply their location information, which will only be used to identify local commenters.

Users retain the intellectual rights to any information they post on the app; however, we reserve the right to remove information that is posted.
