# Description & Purpose

- SeeSaw is a social media app for finding local events
- Used to consolidate event information into a custom user-feed
- Used as a platform for bringing together communities, and to give people more agency in engaging with the community

# Ethical & Intellectual Property Issues

Ethical:
- One issue is that users could create an event with unsafe activity. This can be fixed with user trust ratings.

Intellectual Property:
- SeeSaw was built using an open-source template that is under a public license allowing for monetization and free use
