

## Big Bops (Team No. 24)

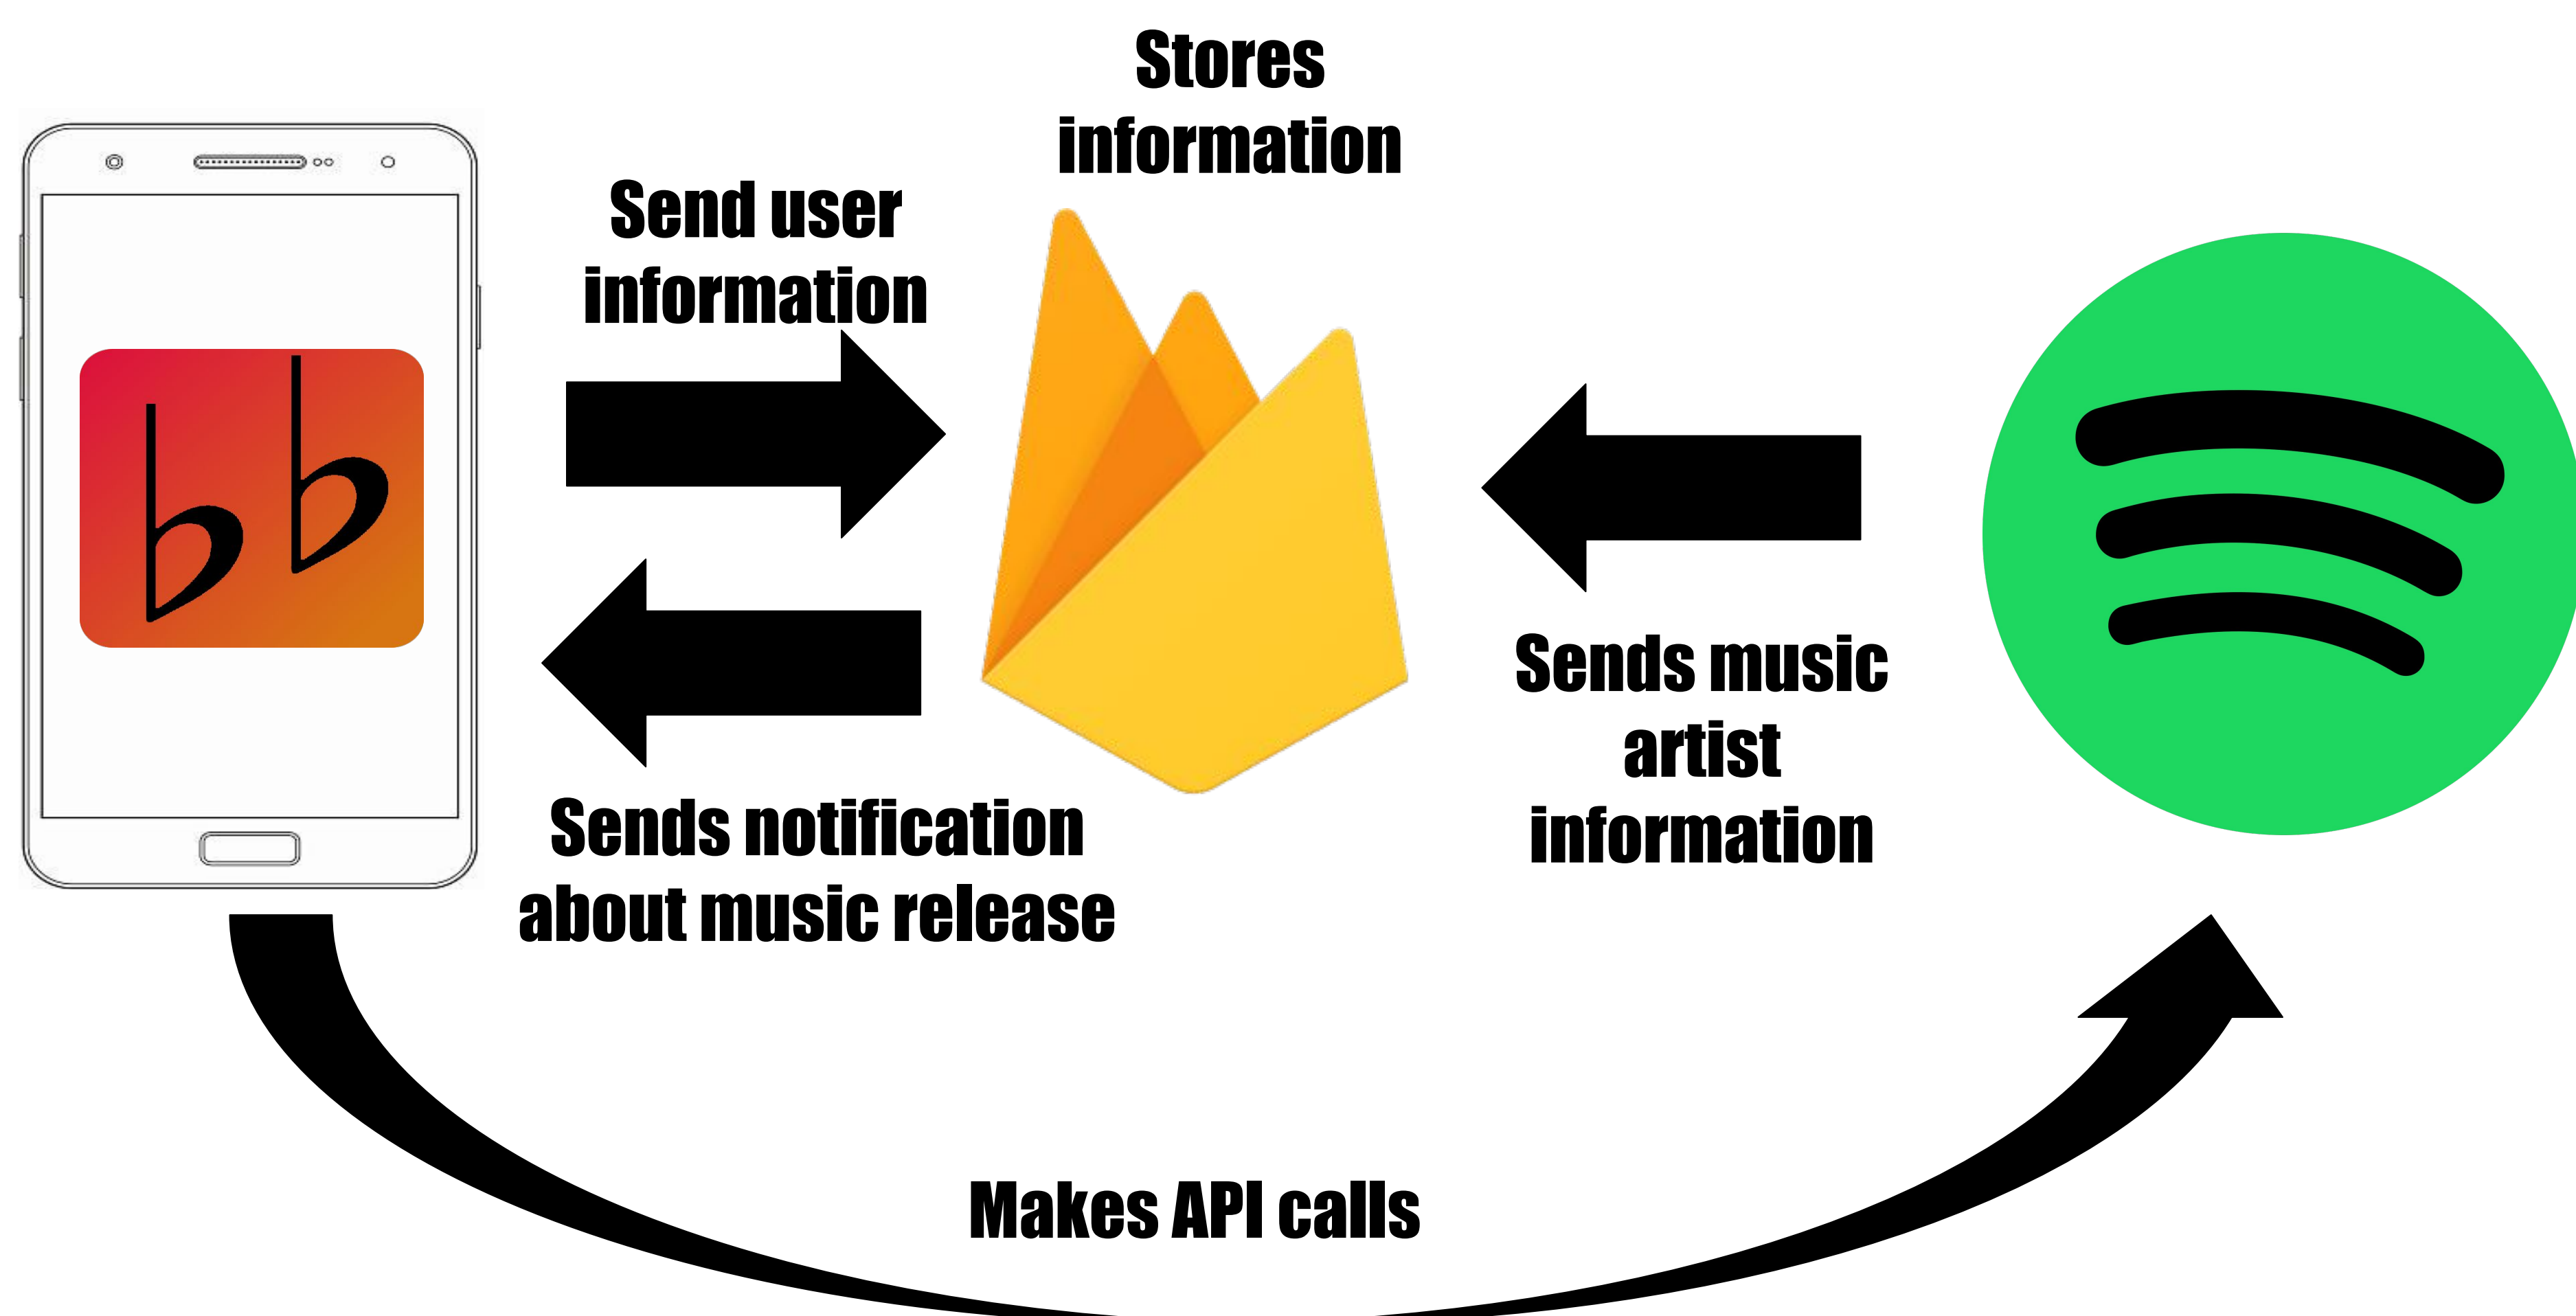

Andrew Hughes (CS), Preston Chanta (CS), Eric Zhuo (CS), William Hecht (CS), Bayley Duong (CS)

### Description & Purpose

- Big Bops is a app designed for notification of music artist's song releases
- Its done to be able to create a feature that Spotify did not have before and adding in new features that we think is useful bundled in an app
- The result is to help others find out when their favorite music artist releases new music on Spotify

### Design

### Ethical & Intellectual Property Issues

#### Ethical:

An ethical issue is that user's information is stored on a Firebase database that isn't encrypted, which could lead to stolen user information.

#### Intellectual Property:

Our code base was designed from scratch rather than using other people's source code which resolves any intellectual property issues.
