

# **EECS710: Information Security and Assurance**

Professor Hossein Saiedian

Fall 2014

**Assignment 5:** Cloud Storage Security

**Points:** 20

**Due:** 10/09/2014

---

There are several popular (consumer) cloud storage options, including Amazon Cloud Drive, Apple iDrive, Box, Dropbox, Google Drive, Microsoft One Drive, etc. Review the file transmission and storage security measures and concerns of two the above options. Prepare your review in a PowerPoint style to be briefly presented to the entire class.

To reduce duplication, we will assign each of the cloud storage above options to individual students.
